

# TECH STUFF

## What Features Does My Software Have?

Since our last news letter, we at Tech Support have had many calls regarding what features are in the software of your systems.

Many dealers call us with questions regarding systems that they have out in the field or at their shops.

Have you ever come across some old software and you just don't know what features are in it?

Well here it is, just what you have been waiting for. A complete list of features for the different versions of software.
